

DJ Sirio DJ - Producer - Live Act

Producer, live-performance dj, designer and webmaster: Sirio is an all-round artist, who started his career with fun and passion by going to the first parties which led him to get more and more involved in Hardcore Music.

Everything started in far 1994, when he approached this frenetic music by going to Number One and to illegal raves throughout Italy. Sirio started his first experimentations the old djtracker and began to produce his first tracks which, some years after, made him an official member of the Sickdjteam. Sirio's presence in the Sickdjteam became such important that the team decided on Sirio's advice to produce a "Sick001" album and to present it to the Traxtorm Records. Important contacts with the Stunned Guys gave birth to their first EP. The year after the following "Inspector Fucker" was released and from the very beginning it was part of the most sold compilation: Traxtorm Power 2003.

The Team witnessed important successes both in the recording and in the artistic sphere, followed by cooperations with Frazzbass and important good reviews.

All these experiences led the Team to approach to and specialize in Frenchcore music, a frenetic, energetic rhythm which hypnotized them from the beginning.

In January 2005 it was "Radium" turn: the Frenchcore creator who has always believed in the potential of the Team. Results were encouraging, but Sirio felt the need to follow his dream and instinct: to impose himself in the hardcore-frenchcore world as a solo artist. After some doubts, he communicated his decision to the Team.

At the moment Sirio is working on several projects with different labels such as Audiogenic Rnd and many others. Expectations are great: just keep on listening!!
