

## **FrazzBass** DJ - Producer - Live Act

Italian icon of terror and speedcore scene, since '99 he had the idea of bringing in Italy the terror sound. Almost 10 years have past already from his first set under the old name group Milan Speedcore Project live.

Without any doubt Francesco Adornetto is the first speedcore dj/producer who mixed live with the support of two laptops as a dj does with turntables and special effects. During the last years he kept perfecting his fast and heavy style by always staying on high quality pro level while taking care of his own releases under his labels (Cerebral Destruction, Noistorm and Masters Of Speedcore).

Between 2003-2005 Richard D.James aka Aphex Twin, during his Rephlex tour, played his 4th release on Cerebral Destruction Shit And Noize Art(SANA04), and this has been a great result and a very good reason to bring his sound to another level.

In Summer 2005 he was almost killed under a terror attack in Sharm El Sheik (Egypt) but luckily he survived! This experience made him stronger and inspired to do some tracks regarding pain and sufference like: "still alive". He gave great support also to the biggest terror event in Berlin (Germany), Fuckparade, donating 1 euro for each cd sold from this release (fuckparade2007-thorn11).

Nowadays Frazzbass is first in the top ten of myspace artists (grindcore and industrial/hardcore) and he is capable to attract hundreds of people to see his performance in live.

He collaborates and worked with the greatest artists from the scene like: The Berzerker, Noisekick Rotello, GFB, The Rapist, The Destroyer, The Stunned Guys, Randy, Radium, The Speedfreak, Mat Weasel, The Sickest Squad, Goetia, Epsilon and many others... He is working right now with his partner Kompex on some new projects, also under their new pseudo group names: Speedkore and Latency F.
