

Vinyl Junk Producer, DJ

This guy has its roots in Hardcore! He takes you on a journey in his own vivid style; Hardcore and beyond. Since the early 90's playing with that wax and well known for his awesome mixing skillz!! Make sure that you are ready for the Junk... He will rock your floor... for sure!

Therefore it's obvious that until today the Vinyl Junk played at many parties trough out Europe. Looking at his long gig list it's mentioning parties like Thunderdome, Nightmare, MegaRave, Multigroove, Mindcontroller, Speedrazor, Earthquake, Pandemonium, Q-base, Nature One, Ground Zero, Ravers Religion, Sonic, Mysteryland, Raving Nightmare and many more. Almost 20 years of deejaying developed him into the top of the bill in deejay techniques. His all time motto: Being a dj has to be taken serious, quality comes first!

Asked for Oldschool, Early rave and Hardcore parties the Vinyl Junk becomes a real allround dj who is to be recognized in his sets. All the styles are presented in a typical Vinyl Junk style and it is not a problem for him to maintain this in extreme long sets up to 8 hours!

So Turntablizm is the keyword! no concessions made!

Because of the fact that the VinylJunk was bored while spinning with two decks only he started the phenomenon dj battles at the "Oldschool Madness" parties where he was the resident DJ. During these multi deck battles two or more deejays mix all together in one set, bringing some extra energy to the audience and raising the art of spinning records to a higher level and bringing new standards into the scene.

During a lot of battles with the use of up to 10 turntables he rocked many dancefloors together with dj's like Buzz Fuzz, Vince, Panic, Darkraver, Gizmo, Dano, Delerium, Viper, Partyraiser, Delerium, Bass-D and many more.

Beside all of this the Vinyl Junk produced a lot of tracks too. Together with dj Cixx a lot of tracks were released at the notorious Thunderdome compilations. The productions of the Vinyl Junk are not to be compared with any others. He has his own typical style; raw, vivid, crossover. Good examples of this are his tracks "Get a Little Stupid", "Forever", "Fractured Minds" and "Freaked outta Acid"

Also he produced a lot of tracks for the Acid Techno crew 2Junxion which are succesfull also. Currently the Vinyl Junk is working on several badass hardcore tracks. They will come, when the world is ready. Stay tuned.

Today the Vinyl Junk keeps innovating and and once again he is finding out new ways to raise deejaying to new levels. It's all about techniques... The future is near...
